

VW716.77
WATER BASED SEALER

FEATURES

- High transparency
- Good sanding
- High body
- Suitable for open and closed pore applications

DRYING TIME (20 °C, 45-65% RH, 140 g/m²)

Dust Free	15 min
Touch Dry	45 min
Sandability	2-3 h

KEY INFO

It does not cause damage by lifting the grain of the wood. It can be preferred for quick and mass production which has easy sanding.

APPLICATION METHOD

SURFACE PREPARATION

The surface must be dry which is removed from oils and residues.

Since water-based products have a tendency to lifting the grain of the wood, sanding with 150-180 grit sandpaper is very important. It is important that the wood to be applied should be well dried and the moisture content should be between 10-14%.

PACKAGING

2.5 LT / 15 LT
