

## ZD420.00 PATINA PAINT

### FEATURES

- Colors the natural wood texture
- Gives an antique and vivid appearance

After the application, it is waited 2-4 minutes for dry. The antique appearance can be obtained by wiping territorially with hard face of scouring pad or with steel wool pad. It can be diluted 1/1 with cellulosic thinner .

For thinning process, acetone and cellulosic thinner should be mixed in a ratio of 1/1. Only 1013 White patina should be thinned at the rate of 2/1.

### KEY INFO

It is suitable to be applied on polyurethane, acrylic primer, sealer and paints.

It is designed to emphasize the effect of products in the ancient period (dark in recesses) and pores on the porous species.

It is easy to clean if it is used extensively and in case of adapt drying time.

It is recommended to use with T0190 patina thinner when it is desired to save time and labor with extra easy cleaning.

20% thinning is recommended for antique effect applications.
