

## **VL195.77.0000 MELAMINE BARRIER (ADHESION INCREASE BARRIER)**

White or wood patterned MDF Lam (melamine coated mdf) is used for furniture decoration works. The products can be used with or without varnish and paint applications.

When varnish or paint is applied on melamine faced panels, adhesion problems generally arise . In order to overcome the problem VL195.77 adhesion increase barrier should be used. After the use of the barrier, both transparent system and lacquer system products can be used.

Except for MDF lam, the barrier can also be used for foil products thanks to its high adhesion property.

MELAMINE BARRIER – TECHNICAL SPECIFICATIONS								
PRODUCT	HARDENER	COMP. RATIOS	SOLID CONTENT (%)	VISCOSITY (DIN4, 20°C)	DENSITY (g/cm <sup>3</sup> )	POT LIFE (20°C, sa)	APPLICATION/ COAT (20°C 60-90g/m <sup>2</sup> )	DRYING TIME FOR OVERCOATING (20°C, h)
